

CUCURBITACEAE Family

(Ann McC., Santa Rosa, CA) exclaims that *Paná-k-ite* has given her the best **lemon cucumbers**, and most delicious **cantaloupes** and tomatoes ever!

Cucumis sativus

Yellow Squash

(Ralph B., Pahrump Valley, NV) has been using *Paná-k-ite* in his garden on asparagus, **squash**, tomatoes, strawberries, bellpeppers, and fruit trees. The asparagus, **squash**, tomatoes and bellpeppers are twice as large as before, and more tender with outstanding flavor.

(Joe C., St. George, UT) I put some *Paná-k-ite* in the soil when I planted **zucchini** and **crooked neck squash** seeds, and got so many we couldn't eat them all. If I forgot to pick them every day I would get some real whoppers!
